

FOR THEIR SURVIVAL

We have been rehabilitating and releasing parrots and other birds onto our 50-acre river-front reserve since 2004. Many of the released birds visit the feeders daily. The sanctuary is also a safe haven for over 140 species of wild birds.

BBR was established with one goal in mind:
SAVE & PROTECT THE BIRDS.

BBR houses between 170 and 230 birds undergoing medical care, hand-rearing, rehabilitation for release, or permanent sanctuary.

OUR FACILITIES INCLUDE:

- Fully equipped veterinary clinic
- Nurseries and quarantine facilities
- Dedicated food prep kitchen
- 5 flight aviaries
- 30 large outdoor enclosures
- Raptor barns & flight
- Water-bird enclosure & flight

We have 6 off-site managed enclosures for the soft-release of endangered species into protected areas

We work with every single species of indigenous & migratory bird in Belize.

We travel all over the country to carry out rescues, releases, vet visits, education & outreach.

We achieve all this on an annual budget of less than \$75,000US

RELEASE IS OUR ULTIMATE GOAL!
Every single wild creature deserves the chance of freedom, so if we can release, we will release!

WAYS TO DONATE

- 1 Donate funds
- 2 Join our Membership Programme
- 3 Species Adoption. The perfect gift!
